ABOUT ME

I am a highly motivated and dedicated software developer with a strong focus on backend development using Java and Spring Boot. I possess a solid understanding of core backend concepts, relational databases, and API development, and I am continuously enhancing my technical skills. As a fast learner and an adaptable professional, I work effectively both independently and collaboratively within a team.

LANGUAGE SKILLS

Language

Arabic (Native)
English (Advanced)

WORK EXPERIENCE

Adaptive TechSoft Co. (ATS) Amman, Jordan

Full-Stack Trainee (Spring Boot & Frontend)

09/2025 – 02/2026

- maintenance of computers
- relations with suppliers
- coaching a junior Ice Hockey team (10 hours/week)
- Learned and applied core concepts of **Java backend development** using the Spring ecosystem.
- Worked with **Spring Core** for dependency injection and application structure.
- Developed backend applications using **Spring Boot**, focusing on RESTful APIs.
- Implemented data persistence using **Spring Data JPA, Hibernate**, and relational database concepts.
- Designed and executed basic **SQL queries** (CRUD operations, joins, filtering).
- Connected and managed applications with a **MySQL database**.
- Gained understanding of **Spring Security** fundamentals (authentication & authorization basics).
- Practiced building structured and maintainable backend systems.
- Acquired basic knowledge of **frontend development** (HTML/CSS/JS fundamentals) to understand full-stack integration.

PROJECTS

DevNet

DevNet is a full-stack platform for developers and employers that combines features from GitHub, LinkedIn, and Stack Overflow. It allows users to share posts, showcase projects, apply for jobs, and communicate in one place.

fittrack-mobile

A fully offline fitness mobile app built with React Native & Expo. Track workouts, log meals, monitor macros, and measure body progress — all stored locally on your phone. Write here the description...

Link <https://github.com/Abood170/fittrack-mobile>

secure-gallery

End-to-end encrypted photo gallery built with Flutter (Web + Android) and Node.js. Images are encrypted client-side using AES-256 before upload — the server never sees raw data. Secure photo sharing between users via RSA-2048 key exchange, with JWT authentication and an admin dashboard.
